Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

Navigation — These are opportunities to improve keyboard navigation in your application.

Heading elements are not in a sequentially-descending order

Additional items to manually check (10) — These items address areas which an automated testing tool cannot cover. Learn version our guide on conducting an accessibility review.

Progressive Web App

These checks validate the aspects of a Progressive Web App. Learn more.

Fast and reliable

Page load is not fast enough on mobile networks

Your page loads too slowly and is not interactive within 10 seconds. Look at the opportunities and diagnostics in the "Performance" section to learn how to improve. - Interactive on simulated mobile network at 10.5 s Current page does not respond with a 200 when offline start_url does not respond with a 200 when offline Timed out waiting for start_url (http://localhost:3006/public/) to respond. Installable **Uses HTTPS** Does not register a service worker that controls page and start_url Web app manifest meets the installability requirements **PWA Optimized** Does not redirect HTTP traffic to HTTPS Configured for a custom splash screen Sets a theme color for the address bar. Content is sized correctly for the viewport Has a <meta name="viewport"> tag with width or initial-scale Contains some content when JavaScript is not available Provides a valid apple-touch-icon

Additional items to manually check (3) — These checks are required by the baseline <u>PWA Checklist</u> but are not automatically checked by Lighthouse. They do not affect your score but it's important that you verify them manually.
